NOTE: Fire Deaths data for Virginia for 2000 to 2005 is compiled from information provided by the Virginia Department of Health, Office of Vital Records, Division of Health Statistics. Numbers are shown for fire deaths based on the specific location of the injury. The 2000 U.S. Census Population numbers were used to calculate the fire death rate for each county/city in Virginia. The numbers shown above for 'Out of State / Unknown' are fire deaths that occurred in Virginia, but the location of the injury was either another state or unknown. In addition, the 'Out of State / Unknown' numbers were not included with the Annual Virginia Fire Death Rate calculations. The Fire Death Ranking is from 1 to 107 with 1 representing the highest number of deaths per population.
